

## Validasi Hanya Data Angka Dalam Datagridview

Coding :

```
Private Sub dgv_EditingControlShowing(ByVal sender As System.Object, ByVal e As System.Windows.Forms.DataGridViewEditingControlShowingEventArgs) Handles DGV.EditingControlShowing
    If e.Control.GetType.ToString() = "System.Windows.Forms.DataGridViewTextBoxEditingControl" Then
        Dim c As DataGridViewTextBoxEditingControl = CType(e.Control, DataGridViewTextBoxEditingControl)
        RemoveHandler c.KeyPress, AddressOf GridViewTextBox_KeyPress
        AddHandler c.KeyPress, AddressOf GridViewTextBox_KeyPress
    End If
End Sub

Private Sub GridViewTextBox_KeyPress(ByVal sender As Object, ByVal ex As KeyEventArgs)
    If DGV.CurrentCell.ColumnIndex = 3 Then
        If ((Asc(ex.KeyChar) < 48 Or Asc(ex.KeyChar) > 57) And Asc(ex.KeyChar) <> 8) Then
            ex.Handled = True
        End If
    End If
End Sub
```
